

## Become a Certified Enterprise IoT Developer with ClearBlade Academy

ClearBlade, the Enterprise Internet of Things platform that rapidly engineers and runs real-time, scalable Industrial IoT applications, has launched the first free Enterprise IoT Training class available online.

ClearBlade is focused on empowering developers to engineer a connected world. Only by growing the communities' knowledge can we achieve our vision of devices seamlessly engaging our customers, apps, and systems. It's clear that the most innovative IoT solutions and applications will be built by talented and skilled enterprise development teams.

Established Enterprise developers having the fundamentals to build the IoT solution of the future. Arming them to connect their existing skills completes the puzzle necessary to start building Enterprise IoT Solutions today. Since demands on the time of a developer are already extensive, the chance to gain exposure to IoT technologies can be challenging. That time crunch is why we've created the ClearBlade Academy, and why we've structured it into self-paced web modules grouped into distinct segments.

Developers, Enterprises and IoT enthusiasts can study the 23 self-paced courses available online right now.

#### Courses include:

- ◆ Introduction to IoT and Introduction to ClearBlade
- ◆ Learn how to Create Systems
- ◆ Learn the Secure Authority Model
- ◆ Learn Messaging and Collections
- ◆ Learn Code Services, Code Libraries, Code Triggers, and Code Timers
- ◆ Learn how to Build Customized Portals
- ◆ Learn how to Deploy and Manage the ClearBlade Edge
- ◆ Learn the SDK's, Adapters, and Integrations
- ◆ Learn the CLI and other Advanced Services

**ClearBlade Academy is more than just a paper certificate that hangs on your wall: It's an opportunity to get first-class training with IoT and associated technologies.**

## Why Become a Certified Enterprise IoT Developer?

1. Learn to Rapidly Build IoT Solutions
2. Ensure a Core Understanding of IoT Security
3. Gain the Flexibility Needed to Deploy and Customize Enterprise Applications
4. Understand how to Build Solutions that Integrate into Existing Systems
5. Establish Yourself as an Expert Within Your Company and with your Customers
6. Grow Your Professional Network with Like-Minded IoT Developers Building Cutting-Edge IoT Solutions

## Who is Ready for ClearBlade Academy?

### Solution Development Courses

Required Skills:

- ◆ Multiple Backend Computer Languages (java, c, python, javascript)
- ◆ Roles-Based Security Models
- ◆ Mobile Technologies
- ◆ Linux

### Infrastructure Support Courses

Required Skills:

- ◆ Docker
- ◆ Linux
- ◆ Cloud Infrastructure
- ◆ DevOps

## About ClearBlade, Inc.

ClearBlade is the Enterprise Internet of Things software company that rapidly engineers and runs secure, real-time, scalable IoT applications.

ClearBlade enables companies to build IoT solutions that make streaming data actionable by combining business rules and machine learning with powerful visualizations and integrations to existing business systems. Built from an Enterprise-First perspective, the ClearBlade Platform runs securely in any cloud, on-premise, and at the edge.

The ClearBlade Edge brings the full power of the ClearBlade Platform to gateways and industrial servers on the plant floor, job site or building facility. Safely behind the firewall, the ClearBlade Edge intelligently syncs with the ClearBlade Platform guaranteeing security, connectivity, execution and speed.

ClearBlade is developer-focused with an extensive library of proven and tested pre-built components and integrations. ClearBlade accelerates the time-to-market while significantly reducing the cost and risk of delivering IoT solutions, creating new business models and revenue streams.

ClearBlade is headquartered in Austin, Texas. For more information about the company and our software, please visit <https://clearblade.com>.

Become a ClearBlade Enterprise IoT Certified Developer by taking the free online classes at <https://clearblade.teachable.com>.
